BATTLE OF MILL SPRINGS SCENARIO

THE FIRST UNION VICTORY IN THE WEST

On 15 January 1862, Confederate Major General George B. Crittenden saw a classic Napoleonic opportunity. His 6000 man division was united in a centralized position against the two dispersed Federal commands in southern Kentucky. Seizing the initiative, he would defeat one enemy force, and then turn on the other. Crittenden planned a night march for 18 January to surprise and crush the 4400 Union troops encamped around Logan's Crossroads.

Luck was not on the Confederate side that night. The weather was miserable: icy rain turned the approach march into a grueling slog through near impenetrable mud. After 6 exhausting hours, their van neared the enemy's cantonment as dawn brightened the blustery sky.

Far from being caught unawares, the Federals, commanded by Major General George H. Thomas, had videttes and pickets

out and alert. Shots range out, couriers galloped the alarm, and Federal troops scrambled into line and toward the gunfire. The Confederates struggled to deploy their column into line. Soon the roar of the first major battle of the Civil War in the west was thundering over the hills of southern Kentucky.

Historically, the Battle of Mill Springs was the first solid Union victory of the war. It set the stage for U. S. Grant's advance into Tennessee, culminating in the capture of Forts Donelson and Henry. It ruined one man's career - Crittenden resigned soon afterward; and made another's. George Thomas's star was on the rise, and would lead him to the command of a Union Army before the bloody war ended more than 3 years later.

But this is a war game: you have the opportunity to change history!

Victory Conditions

The Confederate player is the winner if he has an unbroken infantry unit astride the "X" crossroads at Logan's Crossroads at the end of the game and the Union player is driven from the field by having 60% of his stands broken or casualties. The Union player wins by preventing these conditions.

GAME LENGTH:

24 TURNS

**CONFEDERATE
PLAYER**

“I was out of reach of support or re-enforcement. Under these circumstances I determined not to retreat without a battle. I decided that it was best to attack the enemy, if possible before the coming re-enforcements from his rear should arrive and before the Somerset force could cross Fishing Creek. I could reasonably expect much from a bold attack and from the spirit of my command. “

- Major-General George B. Crittenden, CSA

Rebel Deployment & Arrivals:

CSA forces are placed on the board in Movement Column formation, with Zollicoffer's brigade in the lead. The head of the column should be placed as shown on the road near the south edge of the map.

UNION
PLAYER

"Sergeant of the Guards Pomeroy poked his head into the guard tent and ordered me to beat the long roll. I beat that long roll standing in front of the guard tent in the rain. I was only about half dressed. Some of the men were so excited they did not pull on their shoes. 'They fought in their stocking feet all day'."
